SZÁSZ EVELIN

UI / UX DESIGNER

I am an enthusiastic and detail-oriented UI/UX designer with a dedication for blending aesthetic sophistication with user-centered design. My goal is to craft visually stunning experiences through effortlessly usable and engaging interfaces. I am eagerly seeking opportunities to challenge myself, refine and expand my skills and contribute to meaningful projects that bring real value to users and clients alike.

EXPERIENCE

THRIFTSTUDIO

Collaborated with a web developer to design a **responsive e-commerce website** and **mobile app** for a fictional thrift store as part of the Google UX Design course. Led UI/UX processes including **user research**, **competitive analysis**, ideation, **wireframing**, and **prototyping**. Conducted usability testing to optimize user experience and created branding elements, including **logo design**, **iconography**, and **illustrations** for a cohesive visual identity. A special feature includes an intuitive **admin interface** for the thrift store for efficient inventory management.

ROCK, PAPER, SCISSORS

Collaborated with a web developer to design a **desktop-only browser game**. Developed the game's **visual identity**, including the color palette, typography, and game elements, to create a cohesive atmosphere. Crafted **user flow** and interactions to ensure a seamless and engaging experience, focusing on simplicity and user enjoyment.

FORMAT COLORS

Designed a **Chrome extension** for a web developer to automatically convert color values from platforms like Frontend Mentor into well-defined, human-readable variable names. Created a user interface that balanced the developer's personal style with a focus on practicality, speed, and intuitive use.

EDUCATION

Bachelor's Degree in Stage and Costume Design
2010 - 2013   University of Arts Targu Mures

UI/UX Design Course Certificate
